 Portfolio

### Professional Experience

---

#### React Native Developer, *Woodenclouds*

11/2024 – 09/2025

Thrikkakara, Ernakulam

- Developed multiple React Native apps, including Hostel Mate (hostel management), Oxikart (ecommerce), Vendor sales campaigns app, Logistics app, and agri-tech app etc
- Leveraged Expo, TypeScript, Zustand, Redux, TanStack Query, Formik, Yup, and Firebase (Realtime Database, Authentication, FCM) for building scalable, secure, and maintainable applications across varied domains.
- Successfully deployed apps to Play Store by owning the end-to-end development, QA, and release workflow, showcasing initiative and reliability.
- Managed project tasks via ClickUp, collaborated using Slack, and maintained clean version control with GitHub.
- Took ownership of testing and debugging, and interacted with clients occasionally for requirement discussions and feedback.

#### Software Developer Intern, *Eduzell Technologies and Solutions LLP*

11/2023 – 07/2024

Kochi, Kerala

- Developed mobile and web applications using JavaScript, React Native and React.
- Implemented dynamic features in the full-stack food delivery app “HungryHub” using React Native for the front-end and Django for the back-end.
- Integrated state management with Redux for dynamic cart functionalities, restaurant listings, and real-time order tracking.

### Skills

---

JavaScript | TypeScript | React Native | Expo | React | Git | Firebase | Android Studio |  
Debugging | Tailwind CSS | NativeWind

### Education

---

#### B.Com in Computer Application, *Nirmala College of Arts and Science*

2020 – 2023

Meloor, Thrissur

### Projects

---

#### HungryHub, *Food Delivery Application*

- **Authentication:** JWT-based, integrated with DRF SimpleJWT and Expo Secure Storage for secure session handling.
- **Restaurant Listings & Menu:** Created custom restaurant models and APIs, with filtering capabilities.
- **React Navigation:** Used react navigation for navigating between screens.
- **Cart & Payment:** Real-time cart updates and Stripe integration for seamless transactions.
- **Order & Address Management:** Developed order tracking and CRUD functionalities for user addresses.
- **Search and Filter:** Implemented dynamic search and filter capabilities for an enhanced user experience.
- **Technologies Used:** React Native, Expo, Redux Toolkit, Django, PostgreSQL, AWS, Stripe
